PRESS RELEASE

500 Series Precision Jig Grinder Machine to be Showcased at CIMT 2013

Moore Tool, Bridgeport, CT USA, will be featuring its 500 Series Precision Jig Grinder at the 12th China International Machine Tool Show (CIMT). The event is being hosted in Beijing, China China International Exhibition Center from April 22 through April 27. The 500 Series features Moore ProGrind[®], which includes a number of enhancements to support high-precision production applications. Moore Tool will be in the Swiss Pavillion with their Agent, DKSH China in Hall E2. The booth number is E2-405.

About Moore ProGrind[®]

With Moore ProGrind[®], users can achieve faster cycle times, more unattended cycles and improved savings in tooling costs. Moore ProGrind[®] features a powerful electric grinding spindle and flood coolant system for significantly improved stock removal rates, better surface finishes and longer tool life. Along with a 20-position automatic tool changer and new sensor technology, companies can grind complex parts with greater efficiencies while still achieving the accuracies Moore Jig Grinders are known for.

About Moore Tool

Moore Tool Company offers a complete line of CNC-controlled precision grinding machine systems and accessories. In addition, the company operates a precision manufacturing business certified to ISO 9001 and AS9100 standards with a focus on milling and grinding applications with tolerances below 0.0002" (less than 5 microns). The company is ITAR registered. The company operates out of 100,000 SF in Bridgeport, CT USA and through Moore Special Tool AG in Switzerland.
