PRESS RELEASE

Moore Tool To Showcase New ProGrind® Technology at EMO Hannover

Moore Tool, Bridgeport CT USA, will be featuring its latest jig grinding technology, Moore ProGrind®, at this year's EMO in Hannover Germany, 19-24 September 2011. In response to customer's requests, Moore has introduced a number of grinding enhancements to support ultra-precision small- and large-scale production applications. Moore ProGrind® helps customers realize greater efficiencies and tool cost savings, while achieving superior positioning and surface finishes. Moore Tool will be located in EMO's Grinding Hall (Hall 11) at Stand A55.

About Moore ProGrind®

With Moore ProGrind®, users can expect faster cycle times, improved tool-cost savings and more unattended cycles. Moore ProGrind® features a powerful electric grinding spindle and flood coolant system for significantly improved stock removal rates, better surface finishes and longer tool life. Along with a new 20-position automatic tool changer, new sensor technology and an updated user interface, currently under development, companies can grind complex parts with greater efficiencies while still achieving the accuracies Moore Jig Grinders are known for.

About Moore Tool

Moore Tool Company offers a complete line of CNC-controlled grinding machine systems and accessories. In addition, the company operates an ultra-precision manufacturing business certified to ISO 9000 and AS 9100 standards with a unique focus on 5-axis milling and ultra-precision jig grinding. The company is ITAR registered. The company operates out of 100,000 SF in Bridgeport, CT, U.S.A. and through Moore Special Tool AG in Zurich Switzerland.
