PRESS RELEASE

Moore Tool To Demonstrate 500 Series Precision Jig Grinder Machine at IMTS 2012

Moore Tool, Bridgeport, CT USA, will be featuring its 500 Series Precision Jig Grinder at IMTS 2012, to be hosted at the McCormick Center in Chicago, Illinois September 10 – 15, 2012. The 500 Series features Moore ProGrind[®], which includes a number of enhancements to support high-precision production applications. Moore Tool will be located in the North Building in Booth N-7370.

About Moore ProGrind[®]

With Moore ProGrind[®], users can achieve faster cycle times, more unattended cycles and improved savings in tooling costs. Moore ProGrind[®] features a powerful electric grinding spindle and flood coolant system for significantly improved stock removal rates, better surface finishes and longer tool life. Along with a 20-position automatic tool changer and new sensor technology, companies can grind complex parts with greater efficiencies while still achieving the accuracies Moore Jig Grinders are known for.

About Moore Tool

Moore Tool Company offers a complete line of CNC-controlled precision grinding machine systems and accessories. In addition, the company operates a precision manufacturing business certified to ISO 9001 and AS9100 standards with a focus on milling and grinding applications with tolerances below 0.0002" (less than 5 microns). The company is ITAR registered. The company operates out of 100,000 SF in Bridgeport, CT USA and through Moore Special Tool AG in Switzerland.
